

Lovely Professional University, Punjab

Course Code: CAP599

Course Title: NEXT GEN
COMPUTING
PROJECT I

L:0 T:0 P:4 Credits:2

Course Outcome(s): Through this course students should be able to

- understand understand and Apply concepts of next-generation computing such as cloud, fog, edge, quantum, and high-performance computing to design scalable and efficient computational solutions.
- Analyze real-world problems and select appropriate high-computing architectures, tools, and frameworks to develop project-based solutions.
- experiment Design and implement high-computing projects using modern technologies such as parallel programming, distributed systems, AI accelerators, and big-data platforms.
- Evaluate project performance in terms of scalability, efficiency, security, and sustainability, and present results using standard technical documentation and presentations.
- assess : Assess Project

Description:

A project involves activities that closely relates to professional work in the related field. Upon completion, student will be able to apply the discipline knowledge and capabilities acquired during the programme. A capstone project may incorporate work-integrated learning placements, case analysis and other immersive learning experiences such as study tools, service learning, volunteering, virtual simulations, etc.

Course Weightages:

ATT	CA	MTP	ETP1	ETP2
5	45	0	50	0

Attendance Requirement: Weekly as per time table

Continuous Assessment (CA): Monthly by the supervisor

CA Evaluation Parameters:

Parameter	Marks
Attendance of the student (* If Att% 76-100 Award:4-5 Marks , 51-75% Award:3 Marks, 26-50% Award:2 Marks, 0-25% Award: 1 Mark)	5
Literature review involved the relevant and quality sources or publications	2
Literature review was appropriate, relevant and included quality sources	3
Objectives proposed by the student were mutually exclusive	1
Objectives were realistic to be achieved in stipulated time frame	1

Plan of work was well defined and was realistic to be achieved in stipulated timelines	1
Student drafted the objectives based upon the gaps identified during literature survey.	2
Student has done feasibility analysis required for completion of Project Work such as cost issues,time, operational feasibility etc.	2
Student has worked on identifying the project title/topic and supported his proposal with relevant documentation.	3
Student was able to narrow down the title based upon the literature survey	2
Student was actively involved in discussion with supervisor for identification of the broad areas of project topic	2
Student was well aware of the facilities and challenges to carry out the proposed project work	2
Student was well aware of the recent trends and developments in the proposed area of project topic	3
The categorization of chapters was appropriate and relevant	1
The data analysis techniques, tools/ equipments proposed by student were relevant	2
The flow of the written report was well organized and structured.	1
The literature survey conducted by the student was appropriate and as per the need	2
The objectives were in sequence as per the conceptual framework	1
The plagiarism of the report was as per the prescribed limit.	1
The relevant risks related to the project have been considered.	2
The report was well written and was free from grammatical errors	1
The sample design and size/ data to be collected was relevant and appropriate for the defined scope	2
The steps/action plan/blueprint/algorithm/Methodology formulated by the student is appropriate to solve the problem	4
The student has done the extensive literature survey to further narrow down the broad area of project work	4
The student has explored some real life problems related to which project topic can be finalized.	2

The student has identified in house facility or outside facility to carry out the proposed work	1
The student has sufficiently explored project topics relevant to his/her field/area.	2
The student was able to compile the literature review to find out gap in the proposed area of work	3
The student was well aware of the databases and tools for literature survey	2
The title was clear and comprehensive rather than broad and general	1
Title proposed by the student justifies the scope of the proposed work	2
Variables to be studied were sufficient and appropriate to the study	2
Total	65

ETP Evaluation Parameters:

Parameter	Marks
Candidate has foreseen the procedural, resource specific, statutory challenges to carry out the proposed work.	5
Introductory pages and annexures (List of tables, figures, abstract, index etc.) are included and well placed in the report	4
Knowledge Enhancement	35
Literature in support and in contrast to the proposed work are included.	4
Presentation	30
The candidate was confident and was able to answer the queries/ question raised with proper justifications	5
The candidate was open to the observations and pertinent suggestion formulated during presentation/ Discussion	5
The candidate was well aware about the recent development and trends in the proposed area of work	5
The categorization of the chapters is relevant and logical	3
The figures, tables, charts, schemes etc. are placed at relevant places and are well discussed	4
The flow of report is well organized and free from grammatical errors	4
The literature review is updated till date	3
The literature survey is relevant, adequate and include quality references or sources	3
The research gap is well defined and discussed	5
Viva	35

Total	150
