

CAB211:BUSINESS INTELLIGENCE

L:0 T:0 P:4 Credits:2

Course Outcomes: Through this course students should be able to

CO1 :: understand the fundamentals of database theory and acquire the knowledge of Business Intelligence and Analytics

CO2 :: understand Business Processes and KPI's and Become an expert in Statistics, Decision making, and problem solving

CO3 :: analyze current and historical data and discover how to find trends, market conditions, and research competitor positioning

CO4 :: understand visualization and Report studio.

CO5 :: integrate BI tools with data sources

List of Practicals / Experiments:

Introduction of Business Intelligence and Processes

- Introduction to BI and types, Analytics types, ETL Process, Data visualization techniques, Business Functions, Processes and KPIs, KPI definition and calculation, Understanding how business analytics can help turn data into insight, how to apply business intelligence, accessing content, use of reports, and create dashboards, Learning how to personalize the IBM Cognos Analytics portal, Present information in the form of metrics, KPIs, reports, and dashboards, Perform quantitative and qualitative bus

Reporting in BI

- Reporting types and uses, Introduction to reporting studio, Report studio user interface, Creating, save and run reports, Report templates, managing reports, Types of reports, List reports, Crosstab reports charts, tables, repeated tables, text items, blocks, formatting a report, Report layout guidelines, working with filters, report templates, prompts.

Query Analytics in BI

- Query calculation, drill through using reports, Navigating between pages, query calculation. Creating dynamic headers and titles that reflect report data, navigating to specific locations in reports, creating a customer invoice report, creating a report using an external data file, Using single data items to summarize report information

Dashboard and Visualizations

- Introduction to dashboards and its features, Basic Charts in Cognos, data visualization in BI, types of visualization in BI Demonstrate Hierarchies, Data Granularity and Highlighting features in charts, Perform Sorting, Filtering and Grouping techniques, implementing the widgets, Data processing techniques, working with Dashboards, pins and exploration

Advance Reporting

- Examining the report specification structure, Modifying a report specification, Distributing reports using bursting, Creating burst keys, . Describing characteristics of RAVE visualizations with Active Reports

Active Report and Analytic

- Describing Active Reports, and their value , Converting existing reports to Active Reports, Explaining security considerations in Active Reports , Debugging Active Report behaviour, working with connection and behaviour, Filtering and selecting active report controls, Modifying the interactive behaviour of report controls , Identifying active report controls and variables , Controlling data display using decks and data decks , Optimizing decks for performance
